Employed Network Transformation

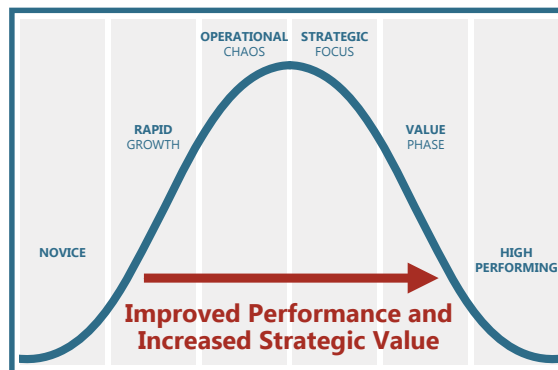

Transforming your collection of employed practices into a cohesive multispecialty group that is aligned with your health system’s strategic direction requires a Shared Vision between administration and providers, and an effective management infrastructure. HSG works with employed networks to reset the path and engage stakeholders in leadership towards the future.

STEPS TO **RESET AND ENGAGE** FOR FUTURE SUCCESS

Employed Network Operational and Financial Performance Improvement

Improving financial performance within your employed network requires a comprehensive understanding of internal performance versus benchmark. HSG helps you identify, prioritize, and execute developed action plans to address operational issues that ultimately drive financial performance.

Employed Network and Practice Turnaround

When a network or a practice leader departs, it can cause major disruptions to operations and financial performance. HSG’s Interim Management team stabilizes operations while supporting the development of future leaders within the organization. HSG can also augment employed network management teams to expand leadership bandwidth, address specific issues, and spearhead improvement efforts.
